

# Enormous Thanks to Our First 100 Founding Contributors

Lung Transplant Housing Support (LT Housing Support) was founded in June 2020 to close the gap in temporary housing and living cost support for lung transplant patient and caregivers in financial crisis.

All BC lung transplant surgery and treatment takes place in Vancouver. To qualify, every transplant candidate and accompanying caregiver must demonstrate the ability to afford temporary housing for a minimum three-month stay near Vancouver General Hospital. For patients who reside outside Greater Vancouver, this is often unaffordable.

We are elated to report that thanks to the generosity of LT Housing Support's first 100 Founding Contributors, many transplant recipients and caregivers themselves, LT Housing Support is already providing financial assistance to lung transplant patients in need.

We extend a grateful thank you to all, including BC's Lung Transplant Program Team.
